

# Versago Installation/Upgrade

The processes to install and upgrade Versago are described in the pages linked below.

## Environment and Security

- [Versago Environment Requirements](#)
- [Application Security](#)

## Installing Versago

- [Installation Instructions](#)

## Upgrading Versago

- [Upgrade Instructions](#)

## Removing Versago

Uninstall Versago via the standard Windows uninstall process in “Programs and Features” in Control Panel.

- Remove the “Third Wave Versago Portal ...” application.
- Remove the IIS website “Versago” if it still exists
- Delete the folder C:\Program Files (x86)\TWBS\Versago

If you are also using Bizweaver and plan to continue to do so you will need to “reinstall” Bizweaver to set the Bizweaver web service port.
