

Site Theme

- Changes to the logo and theme color are automatically displayed in the lower section of the page as changes are made.
- Changes to the logo and theme color will be displayed to users the next time they log into Versago.

Logo

- Click the [**Choose File**] button to select an image file for the site logo.
 - Only **PNG** format files are supported at this time.
 - The logo size should not exceed 170 x 170 pixels. Larger images will automatically be resized but may become distorted. It is best to make size adjustments with an external program before using the image with Versago.

Third Wave strongly recommends that you apply your company's logo to your Versago site if it exposed outside of your network. Although this is not mandatory it helps “brand” the site and confirms to the user that they have reached your site.

Theme Color

- Click a button to select a **Theme Color**. The selected color scheme is automatically applied throughout Versago.
 - Only the color schemes shown are available.
 - Custom colors are not supported at this time.

Form File Upload Size

- The **Form File Upload Size** value defines the maximum size (in megabytes) of a file that can be uploaded into the Versago database.
 - The default of 20 MB is sufficient for most sites.
 - Increase or decrease the value as appropriate for your needs.
